TED - Tenders Electronic Daily
Welcome to Supplying the South West Portal
This portal provides a user friendly, intuitive process to advertise all open tenders and quotation opportunities for councils in the South West. The procurement portal is FREE to join for businesses and offers the following advantages:-
Immediate access to current business opportunities
Receive email notifications on business opportunities that are align with your company
Reduces costs as the process is online
You are in control of your tender submission and not reliant on a third party courier or postal service
Submissions can be completed electronically rather than hand written
Submissions can be amended up until the closing date and time
Register now >
Once your company has registered you need to add the domain @due-north.com to your safe senders list to ensure that you receive all email alerts
On www.supplyingthesouthwest.org.uk
select "Search Latest Opportunities"

The application form:

Selection Questionnaire

(Application to Participate)

Community Health Improvement Services Framework Agreement

Reference DN382042

COMMUNITY HEALTH IMPROVEMENT SERVICES

DN382042

Selection Questionnaire

Purpose

The purpose of this Questionnaire is to seek offers from qualified providers to participate in a Framework Agreement for delivery of a range of Community Health Improvement Services.

Lot 1: Health Checks
This is a check designed for local residents aged from 40 to 74 years old, with some exceptions. The process, as laid out in government legislation, assesses a range of health factors, including smoking status, family history of coronary heart disease, body mass index, cholesterol level, blood pressure, physical activity levels, cardiovascular risk score, and alcohol consumption.

Lot 2: Emergency Hormonal Contraception (EHC)
Emergency contraception can prevent pregnancy after unprotected sex or if the contraception used has failed, for example, a condom has split or missed a contraceptive pill. EHC uses chemicals that affect the release of an egg, and therefore can prevent pregnancy.

Lot 3: Long-Acting Reversible Contraception (LARC)
LARC refers to contraceptive methods that require administration less than once per cycle or month, specifically: copper intrauterine devices; progestogen-only intrauterine systems; progestogen-only injectable contraceptives; progestogen-only subdermal implants.

Lot 4: Needle exchange
Needle and syringe programmes (NSPs) supply needles and syringes for people who inject drugs. In addition, they often supply other equipment used to prepare and take drugs (for example, filters, mixing containers and sterile water). The main aim of needle and syringe programmes is to reduce the transmission of blood-borne viruses and other infections caused by sharing injecting equipment. It also reduces the risk to the public from discarded needles by providing the opportunity for disposal.

Lot 5: Supervised consumption of methadone and buprenorphine
In some instances where an individual is prescribed medication to help treat a substance use disorder, clinical guidance recommends that the patient is observed while taking what is a potentially toxic medication.

Lot 6: Smoking Cessation
Several treatments are available to support people looking to stop smoking, including:

- Psychosocial behaviour change support, which offers people personalised support while they go through the process of quitting;
